PREFACE

This publication presents a series of boundary description maps of Bermuda's 245 census districts. Census districts are the smallest geographic area for which census data is available and are derived from the former postal zone boundaries. Boundary description maps provide a high-level picture of the census districts with descriptive text. Each red box shown on the boundary description maps represents one section of the census district that is mapped as a detailed census district map. These detailed census district maps are available upon request as each census district may have several maps. The first number of each census district represents the parish to which it belongs, as follows:

- 1 - St. George's
- 2 - Hamilton Parish
- 3 - Smith's
- 4 - Devonshire
- 5 - Pembroke
- 6 - Paget
- 7 - Warwick
- 8 - Southampton
- 9 - Sandys

The aim of this map series is to provide census data users with a visual representation of census districts to guide them as they interpret the data. It is hoped that this publication will prove to be a valuable reference for policy-makers, researchers, teachers, students and others who have an interest in Bermuda's social and demographic statistics.

Melinda Williams
